

REMARKS

Applicant has discovered a typographical error in one digit of the serial number of the first listed priority application in the Cross-References to Related Applications section of the subject application. Applicant submits the present amendment to correct this typographical error. The correct serial number is 60/412,389. Applicant notes that the priority claim itself also included a listing of the title and filing date of the application, and thus applicant submits that the priority claim was sufficiently made on the filing date of the application. Applicant requests that an updated filing receipt be issued reflecting the corrected priority claim. Despite the error in the specification, applicant believes that priority claim has been entered correctly into USPTO databases, as evidenced by the attached record for App. Ser. No. 10/667,213.
